MiniDigit[®]

The complete system

The MiniDigit[®] 3-axis tabletop digitisation machine (Y, Z, B) is specially developed by IDEAS for fast, in-house digitisation of lasts in all kinds of materials (wood, hard plastics, PE, PU, Epoxy, etc.)

Once the last is digitised, the file of the last can be sent to any compatible station in the world, where the last can be modified, or directly milled out.

Perfectly integrated with the FootScanner[®], Digitab[®] and FootCad[®] systems for the measurement and design of lasts, MiniDigit[®] makes it possible to exploit the power and precision of custom-made technology by computer.

This system is aimed at last makers, designers and orthopaedists.

The system characteristics

- Digitisation time: 1 last in less than 10 minutes.
- Type: NC digitising machine. - 3 axis (Y, Z, B) fully interpolated.
- Digitisation speed: 30 - 50 rpm.
- Digitisation area: length 400 mm/ diameter 200mm.
- External cabinet dimensions (l x w x h): 1.005 x 690 x 400 mm.
- Weight: 230 kg.
- Power supply: Single phase 230 v -50 Hz (20A).
- Productive.
- Very precise and fast.
- Open interface.
- Easy to maintain.
- Cost effective.
- Internet compatible.
